WWW.THERMAFLOW.COM

The THERMAFLOW Model 934 is designed to give you top performance without using up valuable frame rail space. At only 9.25" wide, it will fit all of your applications. And if mounting behind the cab is what you need, we offer a mounting bracket kit that will simplify your installation. The Model 934 will drive most 3" and 4" product pumps and compressors, with options for multi-pump applications.

STAC Inc...Designing hydraulic systems for your needs!

At STAC, we've been designing hydraulic systems for over 25 years, it's all we do! We'll design a hydraulic drive to fit your application. Besides the Model 934, we offer a number of other models that can fit higher horsepower applications or custom design a cooling system to your needs.

Food Grade - Chemical - Compressed Gas - Crude Oil - Vacuum Pumps - Combo Drives

SPECIFICATIONS
