

THERMAFLOW

Mobile Hydraulic Systems

MODEL

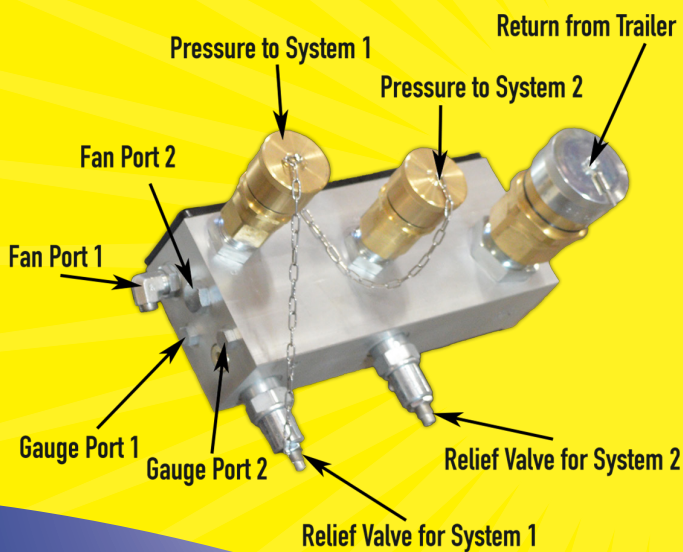

980HFT

**HIGH FLOW and HIGH HORSE POWER
APPLICATIONS**

STAC, Inc introduces the THERMAFLOW 980HFT, their largest cooler to date!

The THERMAFLOW Model 980HFT is a heavy duty, compact hydraulic cooling system that is designed to mount behind the cab, keeping it away from any road debris. The model 980 is our highest capacity cooler, designed to be suitable for the toughest and most demanding mobile hydraulic applications. High flow and high horse power requirements demand a 980 hydraulic system. This compact system makes installation and operations easy and convenient.

Flow Rate: 60 GPM

Reservoir: 9.4 Gallons

Porting: Two 2" FNPT Suction
#20 MJIC Return

Dimensions:
34.5" (L) 14.75" (W) 40" (H)

Frac Start Up
